Video Sale INFORMATION

Video sales are a marketing mechanism that have grown in popularity due to the opportunities they present to producers who deal in large numbers of stocker and feeder cattle. Cattle are generally marketed in trailer-load lots weighing approximately 48,500 pounds; however, we can also sell "partial loads" if there are not enough cattle to make a full trailer-load. Before the sale, a representative from MACS goes to the farm to record video of the cattle while also documenting important information about the cattle including breed, frame, muscling, and fleshing as well as health and nutrition programs. *The following catalog provides this information from our consignors and contractors to assist with marketing the consigned cattle. If you have any questions regarding the stated information, please contact a MACS representative listed throughout this catalog.*

A very good set of home-raised, all-natural calves. Calves have been weaned 90+ days and double vaccinated. They are sired by high-performance Angus bulls. Complete herd records and will qualify as all-natural. Calves are hard, grass type calves with just a medium flesh - no feed after first 2 weeks of weaning. They are docile. An excellent set of reputational cattle ready to go to feed.

A fancy set of home-raised, all-natural, northern-type calves. They are almost straight Angus, out of Angus based cows and Angus bulls and weaned for 60+ days. They are under the Merck PrimeVac vaccination program. There may be 1-2 black skunk tail cattle on the load; however, we have 90 head to sort a load out of. A fancy set of calves ready to go to feed.
